

Ishan Saxena

Software Engineer | Backend & Distributed Systems

06ishansaxena@gmail.com | +91-9205243543 | [linkedin](#) | [github](#) | [portfolio](#)

Technical Skills

Programming Languages	C++, Java, TypeScript, JavaScript (ES6+), Python, Kotlin
Backend Frameworks	NestJS, Node.js (Express.js)
Frontend (Working Knowledge)	React.js, Next.js, HTML, CSS
Databases & ORM	PostgreSQL (Prisma), MySQL, MongoDB (NoSQL), Firebase, Redis
Cloud & DevOps	AWS (EC2, S3), Docker, CI/CD Pipelines, Git
Tools	Postman, VS Code, Android Studio, Figma
Core Competencies	RESTful API Design, Distributed Systems, Microservices Architecture, Caching Strategies (Redis), Relational Schema Design, Authentication & Authorization (JWT, OAuth), Test Automation

Experience

CirclePe

May 2025 – June 2025

Web Development Intern

- Built a blog admin panel for **15+ content types**, integrated **TipTap**, and shipped an SEO-ready **Area Converter tool** for production use.
- Architected scalable **scraping pipelines** ingesting **1,000+ data points**, generating city sitemaps and supporting reliable downstream **data workflows**.
- Prototyped **UX/UI flows** in **Figma** and **React**, improving navigation across devices.
- Improved application performance and reliability using **React.js**, **Next.js**, and **Python**.

Projects

EvokAI — Voice Journal Backend | Node.js, Express.js, MongoDB

[Live App](#) | [GitHub](#)

- Built backend workflows for AI-powered voice journaling, processing conversational metadata and executing **2 scheduled asynchronous pipelines** (daily, weekly) using the **Gemini API**.
- Integrated **Google OAuth 2.0** authentication with secure token verification, role-protected routing, and tenant-isolated persistence for user journal data.
- Architected **6+ versioned APIs** for automated reflection generation with schema validation, request throttling, and fault-tolerant request handling.

SentinelWatch — Hybrid Network Intrusion Detection System (NIDS)

[GitHub](#)

- Developed a high-throughput C++ packet analysis engine with optimized socket I/O and memory-efficient buffering, sustaining **95% packet retention** during SYN flood attack simulations.
- Designed a signature-based threat detection architecture with **RESTful monitoring interfaces**, WAL-optimized SQLite persistence, and resilient IPC channels, achieving **100% alert delivery** under stress workloads.

Lakshmi Didi — Finance Assistant | MongoDB, Express.js, Node.js, Redis

[Live App](#) | [GitHub](#)

- Constructed multilingual (Hindi/English) conversational AI pipelines integrating **Speech-to-Text** → **Gemini** → **Text-to-Speech** systems for voice-driven financial guidance with persona-adaptive responses.
- Engineered dynamic persona orchestration for configurable advisor roles (e.g., Maa, Banker), enabling tone-aware financial guidance tailored to user context and conversational intent.
- Created **10+ service-oriented API routes** for voice sessions, persona orchestration, multilingual processing, financial insight delivery, and history-aware session continuity with structured parsing and secure account-scoped operations.

Education

B.Tech: Computer Science and Engineering

Sept 2023 – Present

VIT Bhopal University (CGPA: 8.86)

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming, System Design, Web Technologies, Software Engineering

Certifications

- Google IT Support Professional Certificate**, Google – *IT Support, OS, Networking* [\[Credential\]](#)
- C++ Programming Masterclass**, Udemy – *Advanced OOP, Memory Management* [\[Credential\]](#)
- McKinsey Forward Program**, McKinsey & Co. – *Business Communication, Leadership* [\[Credential\]](#)
